

Amduus Information Works, Inc.

Webspeed Development & Training Services

Development Services

Do you wish to create a web application that interacts with your Progress database? Perhaps develop an application with a web interface leveraging your internal knowledge of the Progress 4GL? We can help write your Webspeed (or other technology) application. Our pricing is usually between \$50.00/Hr and \$150.00 depending on the complexity of the project.

Training Services

Would you prefer to develop your own application but don't know how? Training can be as low¹ as \$800.00 per person or up to \$3,000 for a group of six.

Training Materials

Perhaps you wish to have media instead of simply person to person training. We offer a set of CD-ROMS for \$1,000.00 with screen casts², source code, and other audio/visual files for learning at your own pace in the comfort of your home or office.

Software As A Service

You don't want to deal with the effort of running a Webspeed application on your servers? Then don't!

It is easy enough to run your Webspeed Application on one (or more) of our servers. We can take care of the networking, database administration, web server administration, etc. You focus on using the features you wanted in your application!

Project Development:
