Staffing

Almost all companies running their own systems will need people to tune, backup, and configure their databases, applications, and the operating systems they run on.

Positions

- DBA
- Developers
- Testers
- Technical Writers
- Program Managers
- Business Analysts
- Project Managers
- More!

Sample Technologies

- Linux/Unix/OSX
- NT
- C, PHP, C++, VB
- .Net, Java, 4GLs
- Progress, Webspeed
- Oracle, MySQL
- PostgreSQL, SQL
- More!

Software Development

Your business is not developing software. Our business is.

Focus

Let us focus on the technology – something we already know.

You focus on what you want it to do. We will focus on how to get it made!

Skills We Bring

- Developers
- Testers
- Technical Writers
- Project Managers
- Business Analysts
- Software Architects

Packaged Software

You made an investment in software. Now you want to make the most of it. We can give you ideas and action.

- SAP
- Mfg/Pro
- Dispatch 1
- NxTrend
- PeopleSoft
- Oracle
- Other!

Software as a Service (SaaS)

Don't want to deal with finding database administrators, system administrators, network administrators, developers... we will run it for you!

Technologies

- Linux/UNIX/OSX
- Apache
- PHP
- Progress/Webspeed
- MySQL
- PostgreSQL

Got an idea?

If you have an idea for a software product we can sell as a SaaS product – let us know. We may be able to reduce your development costs AND share revenues.
