Notes on the Webspeed Demo program on the Sports Database

Set up a copy of the sports database in a directory (NOT sports2000 database)

Unzip the sports.zip file

Start up the database

Apply the file webstate.df file to the database to add the WebState table.

Apply the file secuser.df file to the database to add the SecUser table.

Configure a webspeed broker to access the database

Start up the broker and test that Web Tools can be accessed.

Create a user with the following code (can be done in the Script Lab):

```
CREATE SecUser.

ASSIGN
SecUser.Login = "MyUser"
SecUser.Password = ENCODE("MyPassword").
```

Access the application with an URL like:

http://amduus2/cgi-bin/sports/Login.html
